Newsletter #2

Follow us

Our 2nd Newsletter is out now!

Welcome to the latest edition of our newsletter! We're thrilled to bring you a collection of insightful analyses and important updates from our community.

The Territorial Analysis for TEAMIT+ was conducted and analyzed by UPNA. Do you want to know more about key findings?

Youth entrepreneurship in the Territorial Analysis of TEAMIT+ Consortium

TEAMIT+ despite the notable policy emphasis on promoting youth entrepreneurship, a relatively small proportion of young individuals in employment chose self-employment the European Union. For TEAMIT+ the reluctance of young generations to become an entrepreneur is relevant since we aim at empowering young generations creating their own innovative impactful business.

Our Territorial Analysis, led by UPNA, makes evident there is an urgent need in our territories to foster entrepreneurship among the young population. The evident gender disparity in youth entrepreneurship highlights a crucial aspect that TEAMIT+ should proactively incorporate into its strategies and initiatives. Addressing this gender gap is in line with the project's dedication to cultivating inclusive and diverse entrepreneurial ecosystems. Within TEAMIT+ we aim at fighting the lack of awareness and knowledge about the different types of entrepreneurship, which may be more attractive to young women. Entrepreneurial training in the Territorial Analysis of TEAMIT+ Consortium.

Source: own elaboration from Eurostat

TEAMIT+ aims to create a training program for young generations to learn-by-creating in teams their own impactful businesses, thus becoming "teampreneurs".

In the survey carried out for our Territorial Analysis, led by UPNA, participants were asked "Where do you believe you can obtain better training for improving your entrepreneurial skills?".

Figure 10. Where do you believe you can obtain better training for improving your entrepreneurial skills? TEAMIT+ survey

A prevalent inclination emerged among participants: overall, respondents seemed to favor Vocational Training (VET) over Higher Education (HE). However, the middle option received the most responses. This constitutes an opportunity for HE institutions within TEAMIT+ to position themselves as valuable contributors to entrepreneurial skill development.

24H OF INNOVATION

Tiliniakatemla, KEK ORAMA and CluBE traveled to Biarritz to attend the 100th edition of the "24h of Innovation for the Planet" held by ESTIA. Seeing behind the scenes and understanding the workings of this major event was key for our partners, who will organize the next edition (in Greece, Spain and Finland) on 03-04 December.

This is an event where students, businesses and NGOs come together to take on innovation challenges. For 24 consecutive hours, multidisciplinary teams work on projects focused on ecological and societal transition, trying to find solutions for a sustainable future.

The students presented many interesting and innovative ideas, some of which were awarded at the end of the event. This event is an important opportunity to discuss practical issues that require sustainable solutions, bringing together students and companies.

This next edition of the "24 hours of Innovation for the Planet" will be Module 2 of the TEAMIT+ Expert Course: a Learning by doing training course in impact entrepreneurship in multicultural teams open to all young people aged 18-30 living in Europe.

WORKSHOP AT THE "KOZANI YOUTH FEST 2024"

TEAMIT+ participated in the "Kozani Youth Fest 2024", held in the city of Kozani by GO Alive. CluBE organized a workshop on "How to be an entrepreneur: Sustainable edition". The participants were divided into groups and tried to develop ideas for a new startup company. The main focus was that for a startup to grow, it needs something pioneering.

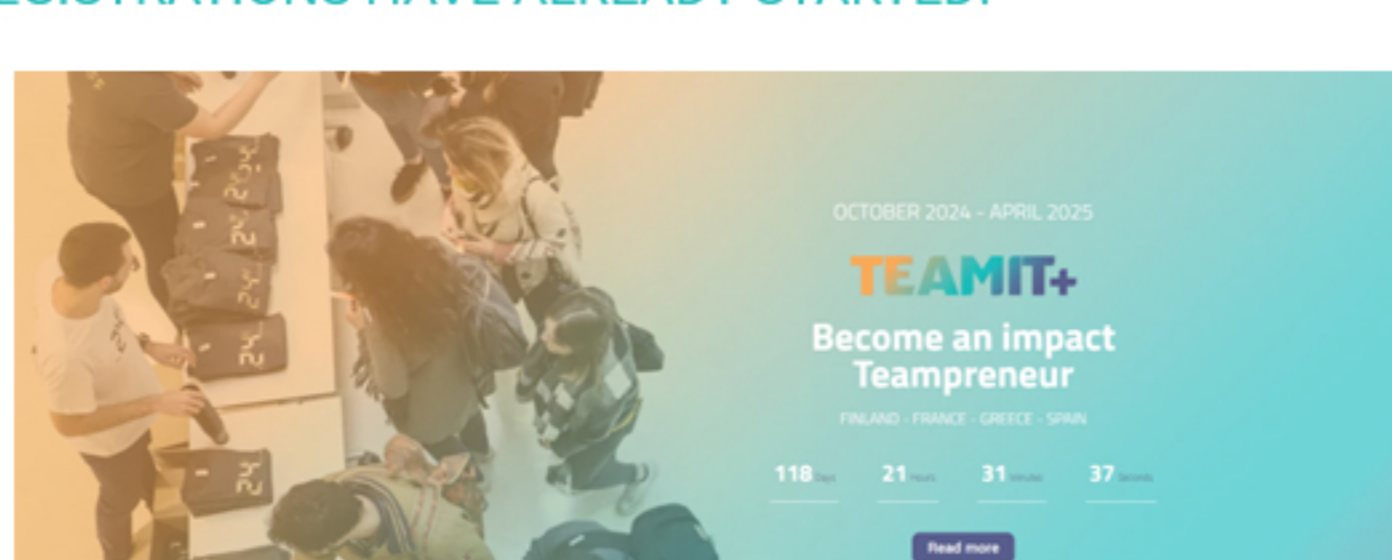

Teams were asked to combine various sectors such as agriculture, bioeconomy, circular economy and energy to create their company. After a productive discussion, some excellent and original ideas emerged for the development of startups in Kozani and the wider region.

At the end of the workshop, the participants were informed about the TEAMIT+ project, its objectives and how to be a part of it, by participating in the 3 training modules.

What's new on our website?

REGISTRATIONS HAVE ALREADY STARTED!

The training program is structured into three dynamic modules:

- Understand** (October 2024): Dive deep into the climate crisis and solidarity issues, inspired by leading local initiatives.
- Innovate** (December 2024): Develop sustainable solutions alongside organizations driving societal change.
- Create** (January - April 2025): Be among the 40 selected young teampreneurs to receive coaching and create impactful collective projects.

Join a 6 month European Expert Course

3 modules to empower yourself in entrepreneurial multicultural teams tackling the climate crisis through cooperative values

This fully funded EU course aims to empower you with entrepreneurial skills and cooperative values, addressing climate resilience and fostering sustainable innovations.

Upcoming Event

TEAMIT+ PARTICIPATES AT THE SEED INTERNATIONAL CONFERENCE ON SUSTAINABLE ENERGY EDUCATION, ORGANIZED BY THE SEED PROJECT

The Conference will take place from 3rd to 5th of July 2024, in Valencia, Spain. It is a forum for researchers, academics, and practitioners to exchange ideas and research results related to several teaching/learning issues about Sustainable Energy Education. Through a collaborative workshop, participants will explore two approaches to integrate sustainability in education: SDGs and entrepreneurship in education.

TEAMIT+ and its goals will be presented during the workshop, linking entrepreneurship with sustainability issues aiming to inspire a change in teaching methodologies. Participants will exchange ideas and share their experiences about teaching methodologies and necessary skills.

About the project
Teampreneur multicultural impact innovation cooperatives aims to develop an innovative educational program applying a pedagogical methodology based on the "learning by creating" approach. The specific pedagogical methodology will be applied to vocational training students, to higher education students, as well as to young immigrants, refugees and the unemployed from different academic subjects. The aim is to enable them to become future entrepreneurs who will influence society by understanding the importance of the transition to a greener economy, based on green, digital and climate resilience skills.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

This project has received funding from the European Union's EACEA - Erasmus+, EU Solidarity Corps. Grant agreement No 101111560
