Wrapping Up the First Edition of TEAMIT+

Over the past few months, the first edition of the [TEAMIT+ training programme](#) has taken young innovators on a journey across Europe – from Finland to Spain, from ideation to impact. With two international bootcamps, intensive coaching, and connections to real-world challenges, participants proved that teampreneurship is a mindset for building a more sustainable, inclusive future.

1st Bootcamp: From Ideas to Impact in Finland

In January, 40 young changemakers from France, Spain, Finland, and Greece gathered at [Tilimäkatemia](#) in Finland for the first TEAMIT+ Bootcamp. This week focused on building connections, forming multicultural teams, and exploring global challenges such as circular economy, education, smart cities, and healthcare.

- Participants explored shared values, learned about social entrepreneurship, and worked in groups to define problems and co-design solutions.
- Inspirational talks and cultural activities added depth, fun, and human connection to the experience.
- By the end of the week, 10 teams were formed, each ready to turn their early-stage ideas into entrepreneurial projects with impact.

"The bootcamp gave us tools, confidence, and a network. But most importantly, it showed us that innovation starts with people." – TEAMIT+ participant

2nd Bootcamp: Impact Teampreneurship in Action

The second bootcamp took place in Bilbao, Spain, hosted by [Mondragon University](#), and marked the conclusion of the first TEAMIT+ cycle. After a month of remote collaboration, teams reunited to prototype, test, and pitch their solutions. Over the course of an intense and transformative week, participants:

- Refined their ideas through hands-on coaching
- Built impact-oriented business models
- Learned how to measure social and environmental value
- Developed and delivered professional pitches for their projects

Despite the challenges every group managed to present a validated, meaningful solution by the final day.

Meet the Winning Teams

At the final Pitching Event, three teams were awarded for their creativity, feasibility, and potential impact:

- **MONSTERA** – Creating green urban solutions to improve air quality in schools and public spaces.
- **CARACOOOL** – Developing a social travel app promoting sustainable mobility and cultural exchange.
- **SNACKADEMY** – Educating youth on sustainable food choices through digital content and community engagement.

These teams **will receive 4 months of coaching and mentoring from Mondragon University** and TEAMIT+ coaches to further develop their solutions and bring them to life.

Discover innovative ideas straight from the teams. Watch their pitches now.

TEAMIT+ at Forward Green Expo

In March, TEAMIT+ joined the [Forward Green Expo 2025](#) in Thessaloniki, Greece — a hub for circular economy and green innovation. The project was presented by CluBE as part of its commitment to bridging youth entrepreneurship with sustainability and industry needs. TEAMIT+ connected with organizations, policymakers, and eco-entrepreneurs who share the same mission: empowering youth to lead the transition to a sustainable Europe.

About the project

Teampreneur multicultural impact innovation cooperatives aims to develop an innovative educational program applying a pedagogical methodology based on the "learning by creating" approach. The specific pedagogical methodology will be applied to vocational training students, to higher education students, as well as to young immigrants, refugees and the unemployed from different academic subjects. The aim is to enable them to become future entrepreneurs who will influence society by understanding the importance of the transition to a greener economy, based on green, digital and climate resilience skills.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

This project has received funding from the European Union's EACEA A – Erasmus+, EU Solidarity Corps. Grant agreement No 101111560
