

NERO

— Every Drop Counts —

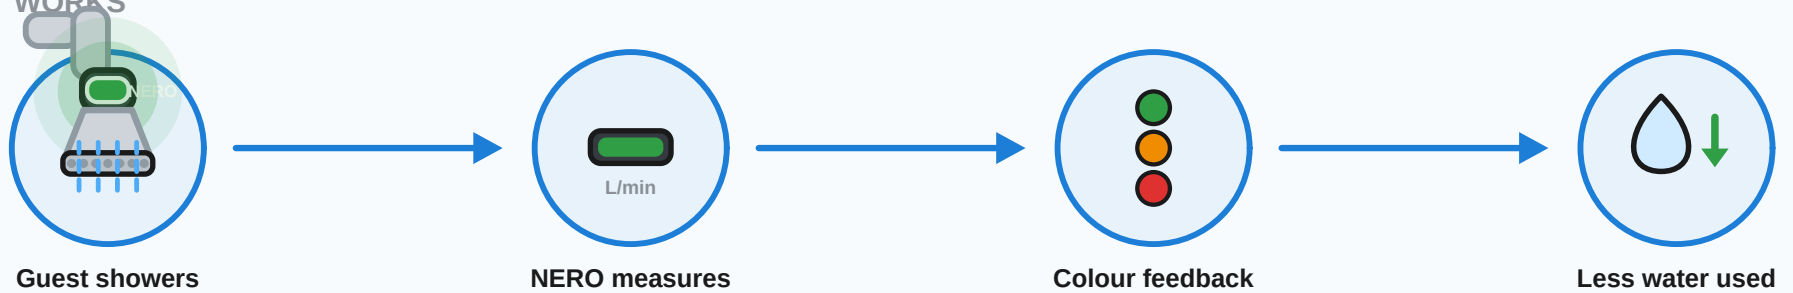

THE CHALLENGE

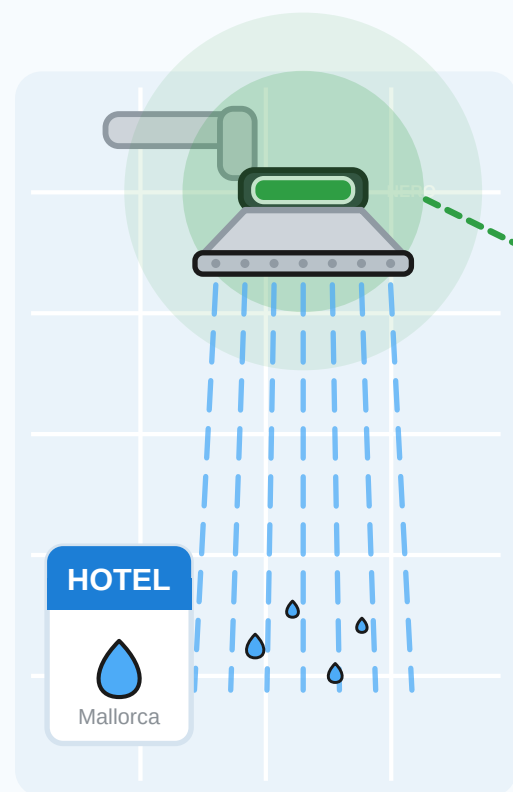

Mallorca faces deepening water scarcity, and peak-season tourists consume far more water than residents — straining the island's limited freshwater resources.

OUR SOLUTION

NERO is a smart shower attachment that gives real-time colour feedback on water use — green, orange, red — nudging guests toward conscious choices without losing comfort.

HOW IT WORKS

HOTEL SHOWER, MALLORCA
The light changes as you shower — no rules, just awareness

REAL-TIME FEEDBACK

GREEN under 50 L

like a local resident

ORANGE 50 – 120 L

above average

RED over 120 L

excessive use
