

# Reissu

— Travel Differently, Live Fully —

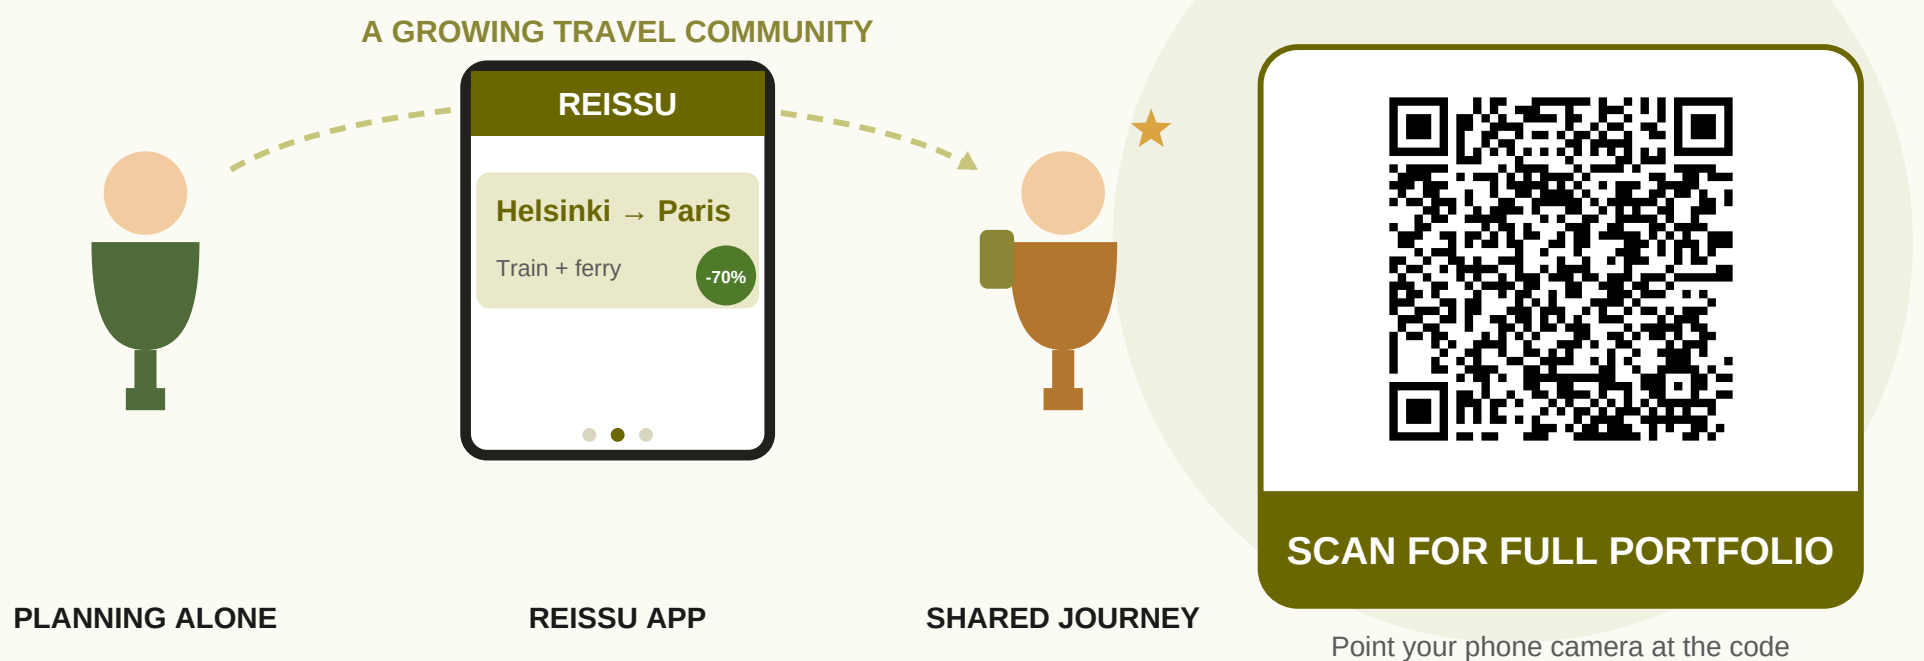

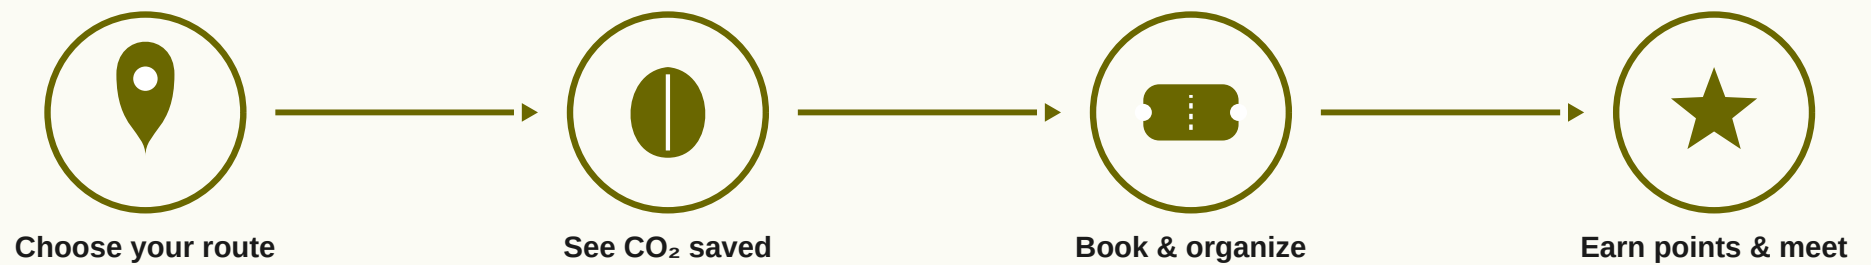

## THE CHALLENGE

Finland has some of Europe's highest flying emissions per capita, yet young Finns rarely consider the alternative. Sustainable travel information is scattered across sites, planning takes real time and effort, and many don't want to travel by train, bus or ferry alone.

## OUR SOLUTION

Reissu is the app that plans low-carbon trips across Europe from Finland in one place — comparing time, cost and CO<sub>2</sub> saved versus flying — while turning every journey into points, a travel scrapbook and a community of fellow travelers.

## HOW IT WORKS

*Turning trip planning into a simple, rewarding way to see Europe*
