

SiteSort

— Helping Companies Make Sorting Easier —

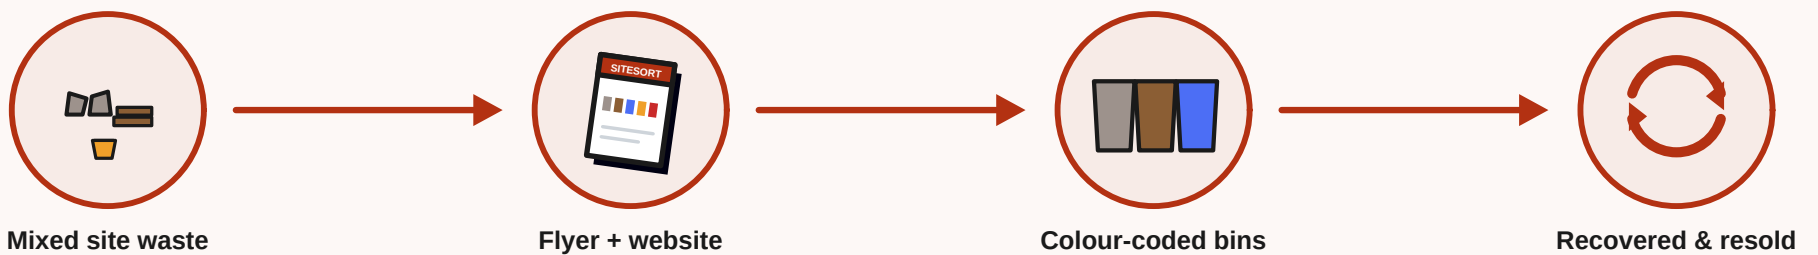

THE CHALLENGE

Construction generates enormous waste that could be recycled, but unclear instructions, tight space and time pressure leave valuable materials mixed and sent to landfill.

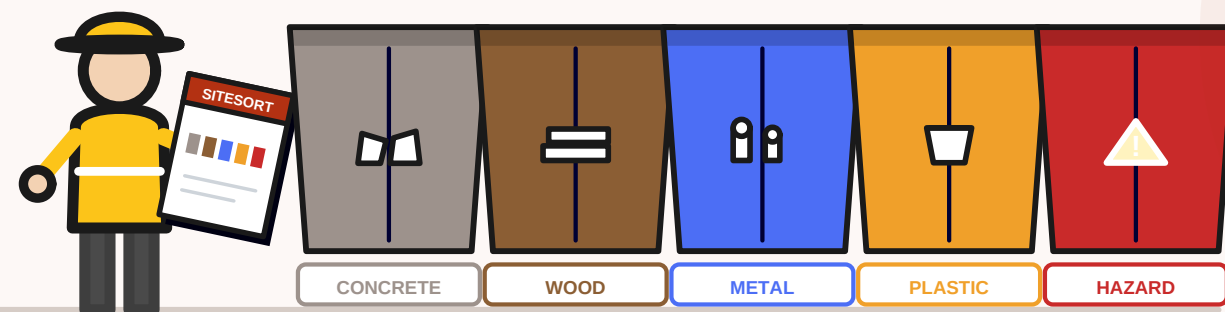

OUR SOLUTION

SiteSort is a simple sorting system for construction firms — a clear brochure, a website and colour-coded guidelines that raise recycling rates and reveal the savings.

HOW IT WORKS

FIVE COLOUR-CODED STREAMS

SCAN FOR FULL PORTFOLIO

Point your phone camera at the code

Clear guidance on site, so materials are sorted instead of dumped
