

Textile Match

— Where Surplus Fabric Meets Its Maker —

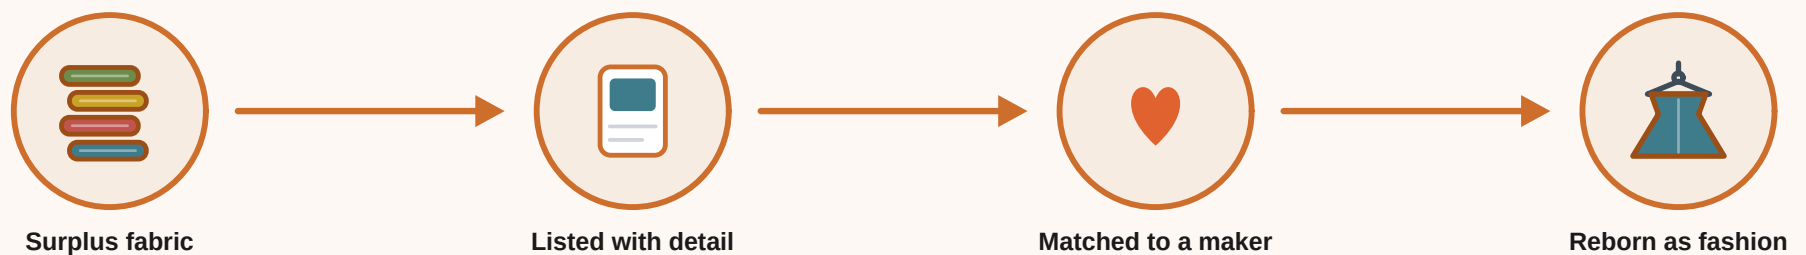

THE CHALLENGE

Factories and charities pile up surplus fabric while makers struggle to source affordable, sustainable material. No easy channel links textile waste to the people who could reuse it.

OUR SOLUTION

Textile Match is a marketplace connecting surplus-textile suppliers with designers and makers. Two spaces — raw materials and finished clothing — plus AI matching and local filters turn waste into new fashion.

HOW IT WORKS

Textile waste becomes a resource — matched to the makers who want it
