

Transport US

— Rebuilding Trust in Public Transport —

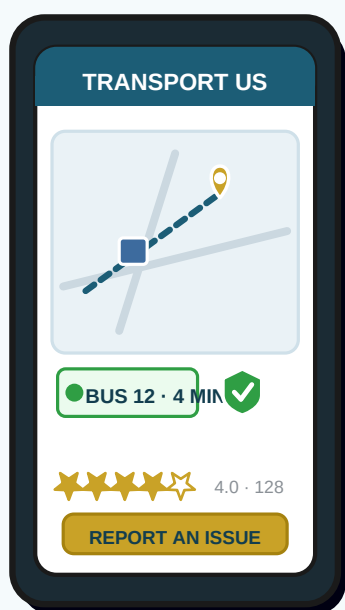

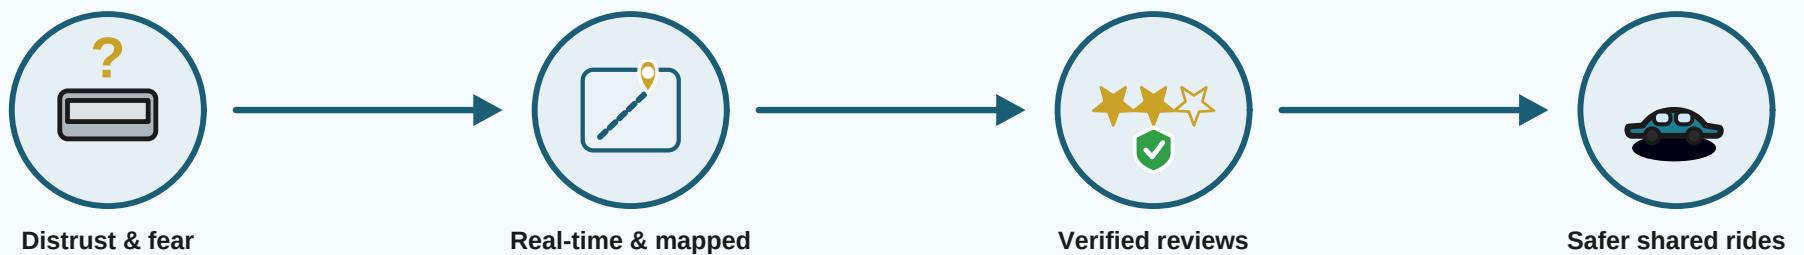

THE CHALLENGE

After the 2023 Tempi rail disaster and years of underinvestment, many Greeks distrust public transport and fear for their safety. Information is fragmented, so people fall back on cars and taxis.

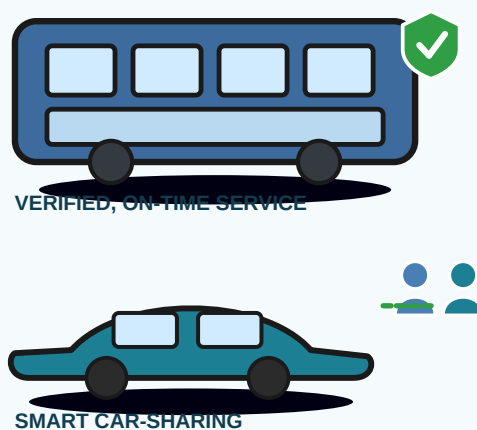

OUR SOLUTION

Transport US is a community-driven mobility app. Real-time information, verified passenger reviews, incident reporting and smart car-sharing make public transport a transparent, trusted choice again.

HOW IT WORKS

LIVE, VERIFIED, IN ONE APP
